# Why DiEntry?

Voltea's DiEntry system removes unwanted salt and hardness minerals using electricity, similar to the cutting-edge technology of the latest electric vehicles, leaving homeowners with healthy, great-tasting, natural water.

- Removes hardness and TDS rather than just exchanging or conditioning
- Easy-to-use with smart monitoring and control
- Minimal maintenance
- Easy installation
- Excellent dealer support and training
- Proven effective worldwide, across multiple applications and installations
- NSF and UL certified

Set yourself apart by offering this innovative solution to your customers, and rest assured that Voltea will go the extra mile to ensure you have what you need to succeed.
